

benchQA 
Test Automation Software for K2

thinkSMART. workSMARTER

The **SMARTER** way to do **AUTOMATED K2 TESTING**

benchQA is a **TEST AUTOMATION TOOL** designed specifically for the **K2 PLATFORM**.

Its **DESIGN** incorporates **YEARS** of experience working with K2 and customers, building and testing K2 smartforms and workflow applications.

Its **EASY-TO-USE** interface allows **TEST ANALYSTS** to rapidly assemble test scripts and cases using its intuitive designer.

The tool is widely used by Velocity itself to ensure **HIGHEST QUALITY** K2 Apps are developed, giving customers piece of mind.

“ benchQA is a QA capability for the K2 platform that assures **QUALITY** K2 Apps are configured and maintained. ”

SMARTER AUTOMATED K2 TESTING

The tool is designed using knowledge and best practices acquired by Velocity over several years of working with K2 blackpearl and K2 SmartForms

FEATURES
